

LAUDA COOLING THERMOSTATS

°LAUDA

Specific application examples

-
- Sample preparation in chemistry and pharmacy
 - Functional testing of electronic components
 - Test of slide bearings
 - Valve testing
 - Stress test
 - Notch bending test
 - Expansion testing
 - Brookfield test
 - Semi-conductor coating

LAUDA Alpha

Affordable cooling thermostats for maintaining temperatures from -25 to 100 °C in the lab

The cost-efficient choice for high-quality LAUDA thermostats

LAUDA Alpha offers reliable technology for temperature ranges from -25 to 100 °C. This line of devices is suitable for internal and external temperature control thermostating with non-flammable liquids (water and water/glycol). The thermostats are the perfect solution for most basic temperature control applications in the lab. Optimized down to the most essential functions, this affordable product line will win you over with its reliability and user-friendliness.

Cost savings through automatic compressor control: Cooling capacity is only provided when it is needed

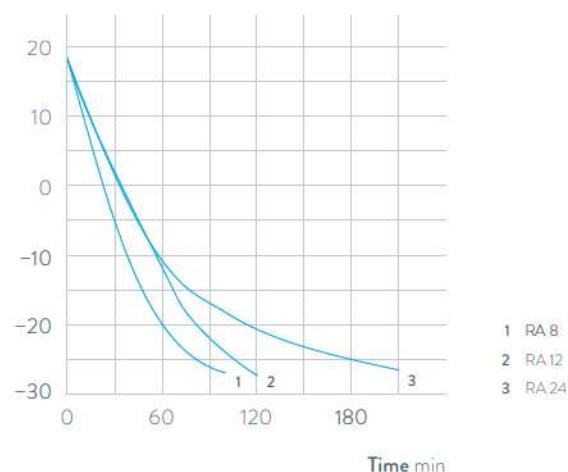

Easy cleaning of the cooling air inlet enabled by simple removal of front cover without tools

COOLING PERFORMANCE

Heat transfer liquid: Ethanol, bath closed

Bath temperature °C

Important functions

- Stainless steel bath vessels
- Drain connection at the rear

Included accessories

Pump circulation set, bath cover, pump link for pump connections

Further accessories

Racks, tubing

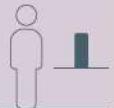

All technical data and power supply variants can be found in the [Technical data](#) section.

More at www.lauda.de/1736

LAUDA Alpha

The cooling thermostats RA 8, RA 12 and RA 24, including standard-issue bath covers and pump connections, facilitate cooling across the entire temperature range from -25 to 100 °C. Automatic compressor control extends the service life of the compressor and offers savings on operation costs.

LAUDA ECO

From -50 to 200 °C: Cooling thermostats for economic temperature control in the lab

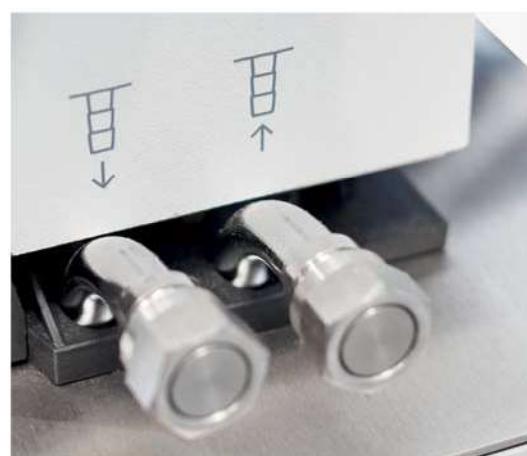

Impressive range of capabilities coupled with easy operation

The ECO thermostats are available in Silver (LCD) or Gold (color TFT display) models with a large number of interface modules as accessories. The circulation pump can be adjusted to six levels. The comprehensive model portfolio offers devices with cooling capacities of 180 to 700 watts and minimum temperatures of -15 to -50°C. The devices of the LAUDA ECO series with the highest performance work with an energy-saving LAUDA SmartCool system, which automatically adjusts the cooling capacity to the required operating status.

The low-temperature thermostats are also available with natural refrigerants as standard for extra environmentally-friendly operation.

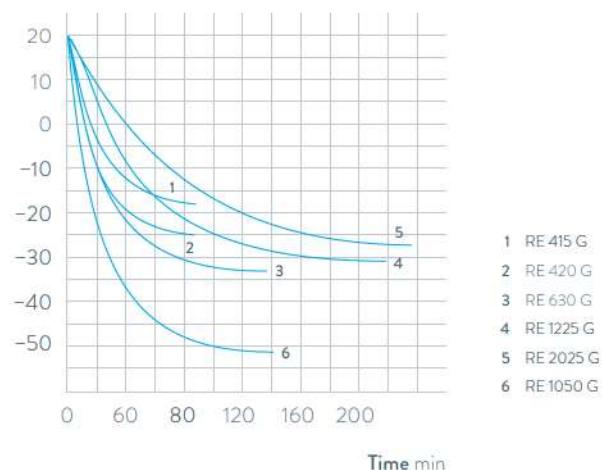

Plain text menu guidance on a monochrome LCD (Silver) or color TFT display (Gold) for easy and intuitive operation

Standard pump connections for temperature control of external applications

COOLING PERFORMANCE Heat transfer liquid: Ethanol, bath closed

Bath temperature °C

- 1 RE 415 G
 - 2 RE 420 G
 - 3 RE 630 G
 - 4 RE 1225 G
 - 5 RE 2025 G
 - 6 RE 1050 G

Important functions

- Integrated programmer for automating temperature profiles
 - Adjustment of flow rate switch for internal/external circulation, can be actuated from exterior during operation
 - USB interface as standard

Included accessories

Bath cover, pump connections, closing plugs

Further accessories

Tubing, interface modules (P, 69)

All technical data and power supply variants can be found in the [Technical data](#) section.

More at www.lauda.de/1738

LAUDA ECO

The cooling thermostats come with a bath cover and pump connections as standard. A drain tap on the back side of the device makes changing the heat transfer liquid easy and safe.

LAUDA PRO

Cooling bath thermostats for professional temperature control from -100 to 200 °C

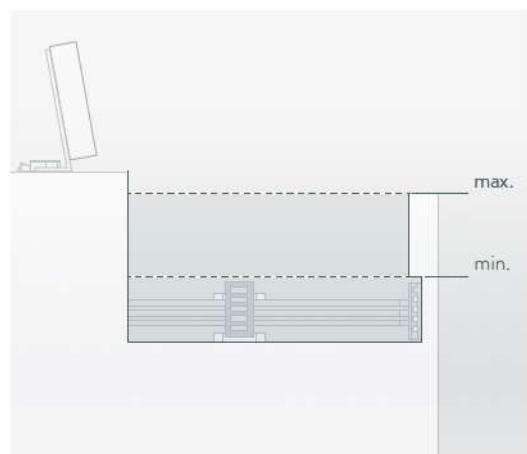

Flexible operation, outstanding performance

With LAUDA PRO, customers gain access to a cutting-edge product line with an outstanding overall concept. There are two operating units available: Base or Command Touch. These can be removed from the thermostat for very high levels of flexibility. On the one hand, this permits remote control of the devices and on the other hand, this considerably reduces the height of the devices. In addition, they are also equipped with a hybrid cooling system as standard. This enables additional cooling of the refrigerating machine with water.

Low device height and 360° accessibility of the bath thanks to detachable remote control

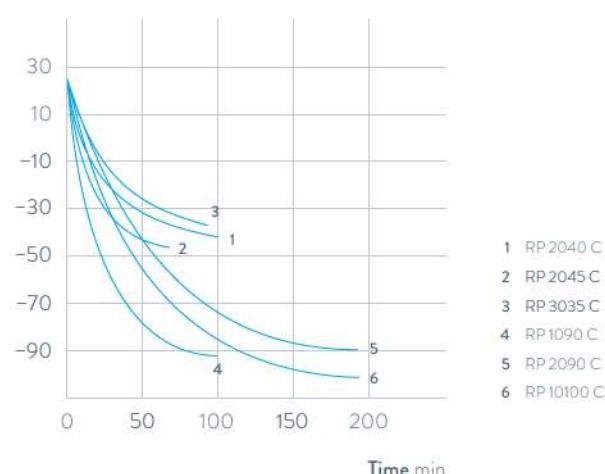

Full functionality of the bath with low minimum fill height

COOLING PERFORMANCE

Heat transfer liquid: Ethanol, bath closed

Bath temperature °C

Important functions

- Internal LAUDA Vario Pump with 8 selectable output levels
- Hybrid cooling of the refrigerating machine permits cooling using ambient air or, in addition, using cooling water
- Standard bath edge heating on all types prevents the formation of ice on the surface of the bath cover
- Ethernet, USB and Pt100 as standard

Included accessories

Bath cover, tubing nipples with screw caps for the cooling coil

Further accessories

External pump, interface modules

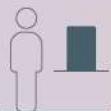

All technical data and power supply variants can be found in the [Technical data](#) section.

More at www.lauda.de/1740

LAUDA PRO

The PRO cooling bath thermostats for internal bath applications offer a working temperature range from -100 to 200 °C. An incrementally adjustable pump ensures excellent homogeneity of the bath. With their bath sizes from 10 to 30 liters and cooling capacity from 0.4 to 1.5 kW, the thermostats are suitable for a wide range of applications.

LAUDA Proline Kryomats

High-performance cooling thermostats from -90 to 200 °C
for use in process technology and material testing

-90 °C

200 °C

High cooling performance and compact design

The Proline Kryomats are cooling thermostats that feature the latest technology with high efficiency and an excellent price-performance ratio. The pressure pump is optimized for internal circulation and can be set to four levels – the standard-issue LAUDA Command remote control also makes it especially user-friendly. Furthermore, integrated bath edge and bath bridge heating prevent the formation of condensation caused by air humidity at low temperatures.

Optimal circulation and temperature distribution throughout the entire bath thanks to an adjustable pump nozzle

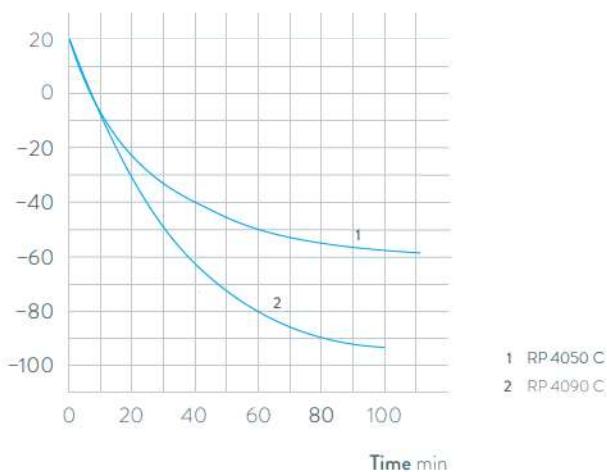

Spacious baths and large bath openings – ideal for bulky test specimens and effective throughput

COOLING PERFORMANCE

Heat transfer liquid: Ethanol, bath closed

Bath temperature °C

Important functions

- Removable Command operating unit with high-resolution, graphic LCD screen and individually selectable display functions
- Programmer with 150 temperature/time segments, can be divided into 5 programs
- Pump connections on side and rear, integrated bypass

Included accessories

Bath cover, tubing nipples

Further accessories

Inset baskets, interface modules

All technical data and power supply variants can be found in the [Technical data](#) section.

LAUDA LOOP

The compact, lightweight circulation thermostat
for external applications from 4 to 80 °C

4°C ————— 80°C

Extremely versatile, flexibly usable thermo-electric circulation thermostat

The LAUDA LOOP circulation thermostat is sure to impress with its constant temperature range between 4 and 80 °C. Its compact construction and low weight, as well as wide voltage input range of 100 to 240 volts, make it possible to put it to use flexibly and spontaneously anywhere in the world – the ›Plug and Play‹ setup with quick-fit couplings makes it especially easy to use. The intuitive three-button softkey operation and simple menu navigation in five available languages via the well-lit, high-contrast OLED display make using the device a breeze.

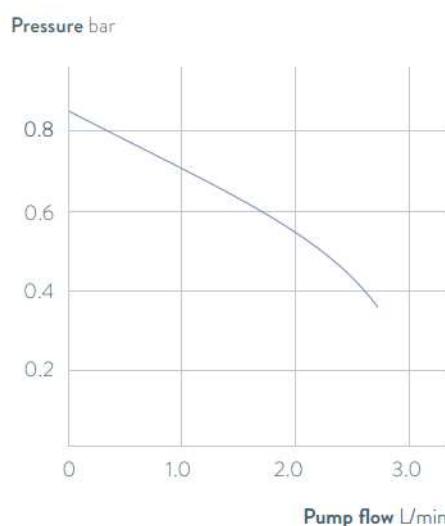

Simple three-button controls with OLED display

Standard-issue RS 232 interface for system integration
into processes

PUMP CHARACTERISTIC Water

Important functions

- Pump connections with quick-fit couplings for easy consumer changes
- Can be operated with non-flammable liquids (water, water/glycol)
- Cooling technology free of coolant ensures silent, low-vibration operation

Included accessories

Hose nozzles for pump connections

Further accessories

Tubing

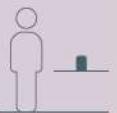

All technical data and power supply variants can be found in the ›Technical data‹ section.

LAUDA LOOP

The L100 and L250 air-cooled device types achieve a cooling capacity of 120 and 250 watt. The devices are primarily for use at constant temperatures with low power requirements. Both device types are especially energy-efficient and silent in partial-load operation.

LAUDA PRO

Compact circulation thermostats for professional temperature control from -90 to 250 °C

-90 °C

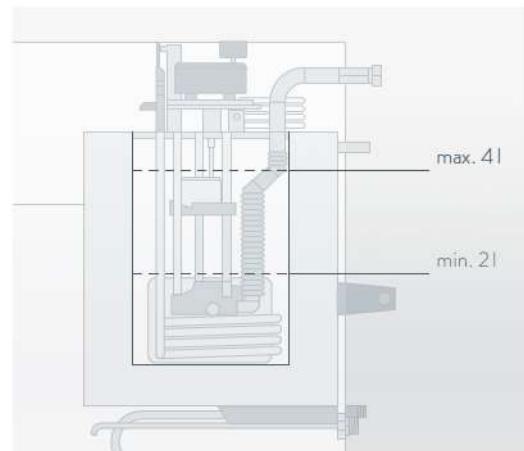

250 °C

Flexible operation, outstanding performance characteristics

LAUDA PRO is the cutting-edge product line with an outstanding overall concept: The circulation thermostats with small, active volumes of liquid enable rapid temperature changes in external applications. The innovative Base or Command Touch operating units can be detached and used as a remote control. The cooling thermostats come equipped with hybrid cooling as standard, which allows for additional cooling of the refrigerating machine with water.

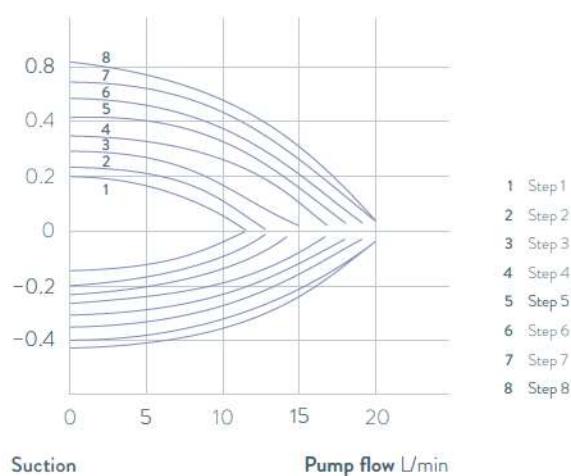

Many basic functions with the economic Base variant

The small filling volume and powerful vario flex pump offer fast temperature changes with low operating costs and material consumption

PUMP CHARACTERISTICS Water

Pressure bar

- 1 Step 1
- 2 Step 2
- 3 Step 3
- 4 Step 4
- 5 Step 5
- 6 Step 6
- 7 Step 7
- 8 Step 8

Important functions

- Tower design for small footprint
- LAUDA Vario Flex Pump with 8 available output levels, pump connections at rear
- SmartCool system for digital, energy-saving cooling control including automatic compressor control

Included accessories

Tubing nipples for pumps and cooling water connection

Further accessories

Tubing, interface modules

All technical data and power supply variants can be found in the 'Technical data' section.

LAUDA PRO

The PRO heating circulation thermostats are designed for external applications up to 250 °C. The compact construction permits space-saving installation of the thermostats. An integrated cooling coil, fitted as standard, provides cooling. The PRO cooling circulation thermostats are ideal for external applications where rapid temperature changes are required. The cooling output of 0.6 and 0.8 kW or 1.5 kW, combined with a very low filling volume permit these rapid temperature changes.
